A MESSAGE FROM THE CHAIRPERSON

Welcome to the Frontier Genetics Annual Sale 2026

This year we are proud to catalogue 133 bulls, comprising of 67 grey and 66 red. Of this lineup, 68% are polled (DNA-verified) and 100% have met our strict Frontier Genetics Code of Standards (see details of the standard on page 9). The bulls listed have made it through many layers of structural and genetic assessment, so all you need to do is decide what type of bull will suit your operation.

To help you build your shortlist, please note our key information release dates:

- June 2026 – Online Sale listing of bulls goes live on the ABBA Website
- July 2026 – Frontier Genetics PDF Sale Catalogue released on FG Website
- August 2026 – Individual lot videos live on YouTube (12th) and full morphology results published on our website (20th).

Our breeding group has certainly been productive over the last 12 months! Most notably, we have successfully partnered with the MLA Donor Company (MDC) to secure a landmark project under the National Livestock Genetics Consortium. Our “Beefing Up Genomics” project, aims to complement the current genetic research happening in northern Australia by developing a scalable model for producer-driven reference populations (see page 12-13 for details).

We got straight to work in February and had our first planning meeting for the project. We valued input from the Australian Brahmans Breeders Association, MLA, Animal Genetics and Breeding Unit, University of Queensland and international experts. We are excited about how our breeding group can share genetic linkage for improved genetic optimisation in northern Australia. We look forward to sharing updates on social media throughout the four year project.

We welcome Anthony Ball, Eliza Connors and the entire Elders Network to our FG team. This year’s online AuctionsPlus Helmsman Sale will be on Friday 28th August 2026. Please reach out to your local Elders branch to get registered and set up well in advance.

Our members have enjoyed getting out and talking to clients over the past year. We have been proud to support several regional events such as GroWQ in Longreach, A Place to Call Home Conference in Townsville, NTCA in Alice Springs, NBRAC in Brisbane, Beef Up Forums in Rockhampton and Morven and the Genetics Australia Conference in Emerald. We also hope to make our inaugural trip to the KPCA Conference in Karratha later this year.

The Frontier Genetics objective remains the same: to showcase a balanced bull, in both genotype and phenotype qualities. We thank you for your interest in our Sale, and we are confident in the Brahmans’ ability to rise to the challenge of current business, social and environmental requirements of modern beef production.

Please join us on our journey, as we continue to stretch the frontier of what a modern selling platform can bring to the industry. We take the guesswork out of bull buying by delivering performance straight from our paddock to yours.

A handwritten signature in black ink, appearing to read 'Bec Burnham'.

ELDERS PROUD TO SUPPORT THE FRONTIER BULL SALE

As I put pen to paper for the very first time for the Frontier Bull Sale, I would like to sincerely thank all vendors for choosing Elders Rural Services as your selling agent of choice. The team at Elders is proud to be working alongside this outstanding group of breeders, and we look forward to building strong relationships now and well into the future.

The Australian beef industry is in an exceptional position in 2026, with much of the country experiencing favourable seasonal conditions. Market confidence remains strong, with many cattle market categories continuing on an upward trajectory for the remainder of this year and beyond. As global demand for high-quality protein—and Australian beef in particular—continues to reach record levels, there has rarely been a better time to invest in superior genetics and unlock greater profitability within your business. I believe the Frontier offering provides the reliable genetics, performance data and breeding excellence to deliver long-term value to commercial producers.

It is impossible not to admire the dedication, passion and commitment each vendor has invested in the development of their breeding programs. Once again, an impressive lineup of Red and Grey Brahman bulls will be presented via AuctionsPlus for your competition. Every bull has met the sale's strict selection criteria and has been independently inspected, ensuring buyers can bid with confidence.

Whether you are looking to introduce new genetics, improve herd performance or simply discuss the sale offering, I encourage you to contact your local Elders livestock agent or visit one of our many Elders branches. Alternatively, please don't hesitate to contact myself or any member of the Elders Stud Stock Team—we would be delighted to assist you.

We wish all vendors every success with the annual Frontier Bull Sale and thank buyers for their continued support.

Anthony Ball
Elders

WE USE

To provide potential buyers with the ability to compare bulls like-for-like, Frontier Genetics uses BREEDPLAN EBVs.

BREEDPLAN EBVS

ABOUT FRONTIER GENETICS

Front L-R: Michael & Michelle Lyons, Wambiana, Roland Everingham, Oak Park, Kate Landsberg, Trafalgar Pastoral, Rebecca Burnham, REB Grazing, Rodger & Grant Jefferis, Elrose, Jennifer McCamley, Representing Lookout. Back L-R: Lance Burnham, Boogal Cattle Co, Dan Radel, REB Grazing, Adam Gunthorpe, Tarramba Red Brahman, Ashley Kirk, Rockley Brahman, Victoria Moffatt, RV Pastoral, Roger Landsberg, Trafalgar Pastoral, Richard Moffatt, RV Pastoral.

We started Frontier Genetics so that beef producers – who prioritise high-performing breeder herds and profit – can have the utmost confidence in the bulls they're buying.

We offer a single platform with more than just a pedigree to inform your choice: we collate ALL the data points you need to find the perfect animals for your environment so you can grow your profits and produce progeny that best suit your end market.

We are thrilled to offer phenotypically desirable animals of high genetic merit, showcased via an online auction through AuctionsPlus.

Our online platform and strict Code of Standards means you won't be selecting from over-fed bulls and can directly compare animals from different breeders and environments on a level playing field.

Thank you for sourcing your bulls from Frontier Genetics.

CODE OF STANDARDS

All Members must be a current financial member of Frontier Genetics Incorporated and agree to be bound by this Code of Standards.

I. EBV/INDEX

- To qualify for the Frontier Genetics Sale, a bull must be above average in either Central Production Index or Live Export Index or both.
- All Sale animals will have EBV data – including accuracies and percentiles – displayed in the catalogue.
- Exceptional (e.g. >top 10, 30 & 50%) percentile traits will be highlighted.

II. BREEDPLAN RECORDING & ANALYSES

- As a **minimum**, members measure and record annually the below traits and submit to BREEDPLAN:
 - Birthdate
 - DNA sire verified
 - 200D weight
 - 400D weight
 - 600D weight
 - Mature cow weight
 - Days to calving
 - Scrotal circumference
 - Genomics
 - Pompes tested (if not certified as bred free)
 - Poll/Horn DNA tested.
- All traits measured, recorded and analysed will be listed against the individual animal on the Sale page, where appropriate.

III. FEEDING AND PREPARATION

- Bulls are to be **predominantly** grass-fed, responsibly raised and responsibly grazed.
- Bulls are to be in a suitable condition for sale and transport at the time of sale.
- **Full disclosure** as to the exact feeding regime **must** be listed on the vendors information page in the Sale catalogue (including, but not limited to, type of pastures and content and description of any supplements fed).

IV. MORPHOLOGY

- All bulls entered in the Sale must have had, within 3 months of the Sale:
 - A full BULLCHECK™ assessment undertaken by a certified Australian Cattle Vet and achieve a 'Tick' or 'Q'.
 - A full Morphology assessment completed and achieve a 'Tick' or 'Q'.
- The Certificates for BULLCHECK™ and Morphology must be provided for every bull.

V. VACCINATIONS

- Full disclosure of vaccinations bulls have received must be listed on the vendors information page in the Sale Catalogue.

VI. JOINING PERIOD

Members must disclose in their bio their Joining periods

- Yearling Joining – Yes/No (in days)
- Heifer Joining Period – (in days)
- Cow Joining Period – (in days).

VII. ABBA REGISTRATION STATUS

- Full disclosure of ABBA registration status and/or eligibility for every animal must be disclosed on Sale page:
 - Fully Registered (Stud)
 - Commercial Registered
 - Eligible for Full Registration
 - Eligible for Commercial Registration
 - Calf Recorded.

VIII. RAW DATA

- To provide potential buyers with the facility to compare bulls like-for-like, Frontier Genetics uses BREEDPLAN. No raw data of any kind is listed on the Frontier Genetics Sale page.

IX. HOOF TRIMMING / CORRECTIVE FOOTWORK

- No bull entered into the Frontier Genetics Annual Sale will have ever undergone hoof trimming or corrective footwork.

From Augathella to Einasleigh, we are enhancing genomic data for the Northern Beef herd to improve fertility, production, and profitability for the Australian Brahman industry.

WHY A PRODUCER-DRIVEN REFERENCE POPULATION?

This project uses Frontier Genetics paddock herds to complement Repronomics and contribute to the Northern reference population. By recording growth, fertility as well as identified 'Hard-to-Measure' and novel traits in commercial settings, we are creating a more precise framework for genetic advancement while inviting other interested producers to join us on this learning journey.

How to register as an AuctionsPlus User/Buyer

01.

✓ Create an account on AuctionsPlus

✓ Verify your email and phone number.

02.

✓ Enter your PIC number, ABN, and business details if applicable.

✓ Read and accept the user rules and responsibilities.

03.

✓ Finalise registration by completing the user quiz.

FRONTIER
GENETICS

GREYS

frontiergenetics.com.au

W

ORKING with nature since 1912,
to manage land and livestock.

A

DAPTED bulls, bred to perform in
northern Australia.

M

AJOR emphasis on fertility to drive
profit in our customer's businesses.

B

ULLCHECK (including Morphology)
on Sale and retained bulls.

I

NPUTS are minimal, allowing the
superior bulls to stand out.

A

PPPLICATION of Indexes for selection,
ensuring key traits are balanced.

N

o dehorning in the future, as polled
genetics continually expand.

A

CCELERATED breeding strategies
(eg IVF) to fast-track genetic gain.

Wambiana Station 2026 Sale Bull Information

Vaccinations

- ✓ 7-in-1
- ✓ Vibriosis
- ✓ Botulism
- ✓ BEF (3-day sickness)
- ✓ Tick Fever
- ✓ Pestivirus PI test results negative

Grazing History

200-400 days	401-600 days
Native Grass	Native Grass
Improved Grass	Improved Grass
Paddock Supp - Dry Lick	Paddock Supp - Dry Lick
601-700 days	701-800 days
Native Grass	Native Grass
Improved Grass	Improved Grass
Paddock Supp - Dry Lick	Paddock Supp - Dry Lick

Feeding notes

Phosphorus supplement during the wet seasons
and urea-based supplement during the dry seasons.
Colemans Stockfeed Bull Mix fed in the paddock for
three months prior to sale, to maintain condition.

Why we are part of Frontier Genetics:

“...We could see the synergy in working
together to increase genetic gain in the
Brahman breed, share knowledge and
expertise and ultimately provide bulls for
sale to a market that is increasingly looking
for bulls with predictability of performance.”

Bred in the North, *for the North*

Fertile cattle with strong carcass traits and weight for age, with good temperaments and sound structures.

Breeding an efficient and profitable article that thrives in Northern Australia, from a cow herd bred in Northern Australia. A herd that is put under constant pressure to perform, through an early joining period which sees the majority of females calve from September to November on a declining plane of nutrition. Coupled with a stringent selection and culling process to ensures only the best are retained to breed bulls for our clients.

Paddock Supp- Dry Lick

Feeding notes

Bulls spent their first 600 days on native pasture, then were given a Coleman's Stock Feeds dry lick supplement for two months prior to sale to maintain their condition.

Why we are part of Frontier Genetics:

"I believe this concept will give breeders not only the opportunity to source new genetics to increase profits in their herds but also be a part of a movement that will not only take the Brahman breed forward but also change the way the broader industry looks at selecting genetics."

UNLEASHING THE POWER OF GENETICS™

Wise Repro - the home of bovine reproduction solutions. Tailored support for cattle producers across every stage of the breeding process.

- MOET, IVF and embryo transfer
- FTAI programs, pregnancy testing and program monitoring
- Bull breeding soundness examinations and semen morphology
- Semen collection and sexed semen production
- Genetic sales, storage and worldwide shipment
- Two semen and embryo Export-Accredited Processing and Collection Centres

EFFICIENT - SCALABLE - PROVEN

From on-farm services to global distribution

Why we are part of Frontier Genetics:

“Real growth comes from people working together towards a common goal. Being able to share genetics and collect data to show how animals hold up in different environments will lead to higher accuracies for Breedplan and greater clarity not only for us, but for our clients.”

WE APPRECIATE YOUR BUSINESS

Image of Elrose Champion Steers of BEEF Australia.

- Decades of continuous selection analysis to underwrite superior performance.
- Concentrating on producing large lines of bulls with depth of breeding, female fertility and performance to ensure a predictable outcome in clients herds.
- Male and female reproduction-days to calving, scrotal, morphology.
- Weight gain on grass - 200, 400, 600 day weights.
- Carcase quality - EMA, rib and rump scans, retail yield, carcase weight.
- Do-ability and docility!

Family owned and operated for 113 years, Trafalgar Pastoral Company (TPC) has consistently bred for premium commercial and seedstock grass-fed markets. With a passion for being environmentally sustainable, we are proud to breed quality red and grey Brahman bulls that can adapt to any environment with minimal inputs. With a reputation for quiet temperament and data backed growth, TPC is a reliable option for any herd.

Temperament. Fertility. Growth

Lookout Brahman

Proud to be named
a 'Top Stud' in
Bush AgriBusiness'
Top Studs 2023

- Extensive recording coupled with genomics contributing to higher selection accuracies
- Controlled breeding (cows and first calvers raise a calf and rebreed)
- Ovarian scan yearling heifers to detect early puberty
- Carcase and fat scanned
- Breedplan Herd Completeness Rating of 5 Stars
- Naturally bred and raised (no chemical policy) – buffalo fly skin lesions not tolerated
- Good constitution – easy doing

Join the Frontier Genetics Advantage

Our bulls are pasture raised, rigorously tested, and ready to work in diverse and challenging environments. Invest in genetics that promise improved profitability, and long term positive outcomes for your herd.

Herd managed by

Jak Pearson 0429 357 155 and

AgriBusiness' Top Studs 2023 & 2024

Rockley Brahmans: Excellence in Breeding Since 1954

At Rockley Brahman, we breed elite red Brahman bulls and females perfect for stud breeders and commercial beef producers. Our animals boast high fertility, calm temperaments, and efficiency, offering a perfect balance of phenotype and genotype.

TOP GENETICS

Our Brahmans excel in any environment, combining superior genetics, nutrition, and care.

ELITE SELECTION

Assessed against seven elite breeding attributes and graded through our weaner system.

DATA-DRIVEN

Strong advocates of BREEDPLAN for precise data collection.

Vaccinations

- ✓ 7-in-1
- ✓ Vibriosis
- ✓ Botulism
- ✓ BEF (3-day sickness)
- ✓ Pestivirus

Why we are part of Frontier Genetics:

"The Frontier Genetics concept aligns perfectly with our vision, as it brings together a community of successful producers who share our values. We appreciate the idea of selling animals that enhance genetic quality, helping producers elevate their operations. Additionally, we value the focus on education and the commitment to transparency regarding our management practices and breeding programs."

Grazing History

200-400 days

Brigalow country. Native grasses, buffel grass and leucaena. Paddock-fed with dry lick.

601-700 days

Brigalow country. Native grasses, buffel grass and leucaena. Paddock-fed with wet lick

401-600 days

Brigalow country. Native grasses, buffel grass and leucaena.

701-800 days

Brigalow country. Native grasses, buffel grass and leucaena. Paddock-fed with wet lick

Feeding notes

Dry lick = Grower, supplied by Williams Stock Feeds, from 01/08/2025 to 14/09/2025.

Wet Lick = Forta-Mol Molasses Slurry, supplied by Williams Stock Feeds, from 03/06/2026 to Sale Day.

WE APPRECIATE YOUR BUSINESS

COMMERCIALY FOCUSED BREEDING

REB Grazing is a commercially focused seedstock business, run by *Rebecca Burnham* and *Dan Radel*, at "Burenda", Augathella. REB was formed after 30 years of managing Brahman commercially, experiencing firsthand the breeds market versatility.

0419 776 249 (*Bec*) 0427 545 399 (*Dan*)  REBgazing

REB Grazing 2026 Sale Bull Information

Vaccinations

- ✓ 7-in-1
- ✓ Tick Fever
- ✓ Vibriosis
- ✓ BEF (3-day sickness)
- ✓ Pestivirus PI test results negative
- ✓ Botulism

Grazing History

200-400 days

Native pasture, Mitchell Downs and oats

401-600 days

Native pasture, Mitchell Downs, improved pasture Bambatsi and wet lick

601-700 days

Native pasture, Mitchell Downs, improved pasture Bambatsi, wet lick and oats

701-800 days

Native pasture, Mitchell Downs, improved pasture Bambatsi, wet lick and oats

Why we are part of Frontier Genetics:

“.....to be a part of a producer breeding group, that takes a collaborative approach towards optimising beef breeding. Then, to be able to offer the industry a unique ‘one stop online shop’, of pasture-fed genetics, where selection is made simple with a strict genetic standard. That is my why.”

Feeding notes

Wet lick is Anipro from December 2025 to sale.

Tarramba Brahman 2026 Sale Bull Information

Vaccinations

- ✓ 7-in-1
- ✓ BEF (3-day sickness)
- ✓ Pestivirus
- ✓ Botulism
- ✓ Vibrio

Why we are part of Frontier Genetics:

“The Frontier Genetics sale emerged from the shared vision of Brahman breeders who value profitable, measured genetics. We aim to showcase our collective efforts and demonstrate the positive impact that great Brahman genetics can have on Australia.”

Grazing History

200-400 days

Black soil downs, native grasses, buffel grass and leucaena.

401-600 days

Black soil downs, native grasses, buffel grass and leucaena.

601-700 days

Black soil downs, native grasses, buffel grass and leucaena, paddock fed wet lick.

701-800 days

Black soil downs, native grasses, buffel grass and leucaena, paddock fed wet lick.

Feeding notes

Wet lick is Williams wet lick started on 03/06/2026.

EBV'S EXPLANATORY NOTES

Only GROUP BREEDPLAN EBVs with Accuracy (Acc) can be validly compared between Brahman herds.

ESTIMATED BREEDING VALUES (EBVS)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). They are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or it's relatives. The following guide is given for interpreting accuracy:

ACCURACY RANGE	INTERPRETATION
less than 50%	EBVs are preliminary and could change substantially as more performance information becomes available.
50 - 74%	medium accuracy, usually based on the animal's own records and pedigree.
75 - 90%	medium-high accuracy. Some progeny information included. It is unlikely that EBVs will change much with addition of more progeny data.
more than 90%	high accuracy estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

TRAITS

BIRTH

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

FERTILITY

GL: Gestation Length EBV (days) provides an estimate of genetic differences between animals in gestation length. Lower or more negative Gestation Length EBVs are considered to be more favourable.

SS: Scrotal Size EBV (cm) is calculated from the scrotal circumference measurements of males taken between 300 and 700 days of age. Values are adjusted to 400 days of age. This EBV is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate larger scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

DC: Days to Calving EBV (days) is an indicator of female fertility based on the time between a cow's first exposure to a bull and when she subsequently calved. Cows that calve late in the season or fail to calve are penalised. Lower (negative) EBVs are preferred indicating shorter days to calving for the sire's daughters.

PNS: Percent Normal Sperm EBV (%) provides an estimate of genetic differences in percent normal sperm, calculated from measurements taken as part of the bull breeding soundness evaluation (BBSE) at around two years of age. It is expected that the sires with higher (ie more positive) PNS EBVs will produce sons with higher PNS compared to sires with lower (ie more negative) PNS EBVs.

GROWTH

MILK: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weights of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Moderate EBVs are generally more favourable.

Carcase CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

CARCASE QUALITY

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcase. More positive EBVs indicate larger eye muscle area and therefore higher retail beef yields.

RIB: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RUMP: Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase weight.

SF: Shear Force EBV (kgs) provides an estimate of genetic differences between animals in meat tenderness. Shear Force EBVs are expressed as kilograms of shear force that are required to pull a mechanical blade through a piece of cooked meat. Lower, more negative, EBVs are more favourable, indicating that relatively less shear force is required, and hence that the meat is more tender.

TEMPERAMENT

FT: Flight Time EBV (secs) provides an estimate of genetic differences between animals in temperament. Flight Time EBVs are expressed as differences in the number of seconds taken for an animal to travel approximately 2.0 metres after leaving the crush. Higher (ie longer) EBVs are more favourable, indicating relatively longer time taken to exit the crush and hence relatively better temperament.

SELECTION INDEXES

Central Production Index - Estimates the genetic differences between animals in net profitability per cow joined for a typical self-replacing commercial herd targeting pasture finished steers (e.g. central Queensland). Selected heifers are retained for breeding and so maternal traits are of importance. Steers target 580 kg live weight (315 kg carcase weight and 10 mm P8 fat depth) at 27 months of age, and heifers 470 kg (250 kg carcase weight and 12 mm P8 fat depth) at 25 months of age.

Live Export Index - Estimates genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd (tropical environment) targeting steers for the live export markets. Steers are assumed to be pasture grown to shipment and entry to overseas feedlots. Steers are assumed to be marketed to the live export agencies at 300 kg live weight and then slaughtered after 120 days feedlot finishing at 470 kg live weight (255 kg HSCW).

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
(b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
(c) A buyer is bound by these terms and conditions by bidding at auction.
(d) Competition and Consumer Act (Cth) 2010
It is unlawful for parties that are, or otherwise would be, in competition with each other to make, or give effect to, a contract, arrangement or understanding that contains a provision relating to:
 - i. price-fixing; or
 - ii. restricting outputs in the production and supply chain; or
 - iii. allocating customers, suppliers or territories; or
 - iv. bid-rigging; or
 - v. collusive bidding.Large fines and other sanctions may be imposed for unlawful conduct.
2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors and agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.
(b) When used in these terms the expressions "companion animals" means all animals originating from the same property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.
3. The following applies in interpreting these terms and conditions:
 - (a) The following words have the following meanings:
Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;
Livestock means animals auctioned pursuant to these terms and conditions; and
Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions
 - (i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
 - (ii) plus any GST added in accordance with clause 12.
 - (b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.
4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.
5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.
6. A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.
7. Prior to the fall of the hammer the auctioneer shall announce the last bid and receive any further bids. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
8. In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.
9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interest of the vendor and need not give reasons for doing so.
10. A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.
11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:
 - (a) the purchaser's name; or
 - (b) the bid card number which identifies the purchaser; or
 - (c) the name of the person on whose behalf the successful bid was made; and
 - (d) the Property Identification Code (known as the "PIC") of destination.
12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.
13. The vendor warrants;
 - (a) That the vendor has (or will have) the right to sell the livestock at the time of delivery; and
 - (b) That the purchaser will obtain title on completion of the purchaser's obligations under this contract including payment.
14. If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.
15. The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in an agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.
16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.
17. (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.
(b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.

CHAPTER TWO - STANDARD TERMS OF SALE

- (c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.
18. (a) Subject to this clause the sale is complete on the fall of the hammer.
- (b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:
- (i) delivery is taken by a representative of the buyer;
- (ii) departure of the animal from the purchaser's delivery pen; or
- (iii) one hour after the last animal is:
- a. in the case of pre-sale weighing, sold; or
- b. in the case of post-sale weighing, weighed.
- (c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.
- (d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.
- (e) This subclause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, for delivery to and from the scales, to the buyer's delivery pen and onto the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This subclause does not apply if the agent makes an announcement to that effect prior to sale.
19. (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.
- (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.
- (c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner was pregnant on that date.
- (d) For slaughter cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.
- (e) For other slaughter livestock the agent undertakes to make every reasonable effort to ensure that the NLIS information is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.
- (f) Where livestock have a food safety or market eligibility status derived from the National Vendor Declaration (NVD) and/or the NLIS/ERP database, the agent will inform the buyers by presale catalogue and/or announce the status prior to the offering of those lots.
20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:
- (a) does not acquire title to the livestock;
- (b) holds the livestock as bailee only for the vendor;
- (c) must act in a fiduciary capacity in its relationship with the vendor;
- (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
- (e) is responsible for the safety and well being of the livestock;
- (f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
- (g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
21. The purchaser agrees that:
- (a) Clause 20 creates a registrable security interest under the Personal Property Securities Act (Cth) 2009 (PPSA);
- (b) the Purchaser acknowledges the rights of the Seller (and/or the Agent if Clause 25 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
- (c) the Livestock are collateral for the purposes of the PPSA;
- (d) to the extent permitted, the Purchaser waives any right the Purchaser has under the PPSA to receive notices; and
- (e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to this contract
22. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.
- 23.1. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.
- 23.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.
- 23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.5 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.
- 23.4. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:
- (a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
- (b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.
- 23.5. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).
- 23.6. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
- (a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE CONTINUED...

rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and

- (b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.
- 23.7. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.
- 23.8. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:
 - (a) by this clause 23, other than as it expressly provides; or
 - (b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.
- 23.9. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.
- 24. (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.
 - (b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.
 - (c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
- 25. (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.
 - (b) The vendor, the agent and the buyer agree to comply with their several duties under the Australian Animal Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the jurisdiction in which livestock are consigned, managed, received, transported and handled in the course of the auction process.

CHAPTER THREE – VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

- 26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
- 27. The warranty of a vendor is that livestock and their companion animals offered for sale at auction:
 - (a) pass government and other regulatory authority requirements and inspections at the time of slaughter;
 - (b) are of merchantable quality;
 - (c) carry an NLIS device in accordance with State law;
 - (d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in any document, the livestock will have those characteristics or will be fit for the particular purpose or market; and
 - (e) all information in any document provided by the vendor is true, complete and correct in all material respects.
- 28. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.
- 29. However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.
- 30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.
- 31. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:
 - (a) the buyer will be entitled to delay payment for the price of all livestock in that lot only; or
 - (b) the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.
- 32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:
 - (a) any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
 - (b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
 - (c) any failure by the auctioneer to announce prior to bidding, or disclose in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

33. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
34. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by government. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the relevant government certificate, existed prior to the fall of the hammer.
35. A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.
36. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
 - (a) a certificate is issued by government which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
 - (b) the certificate is received by the selling agent either in its original form or by fax or electronic communication in the form of data, text or imaging by 5:00pm on the 7th day after the fall of the hammer; and
 - (c) if the condemnation is due to chemical residue the certificate follows testing in a government approved laboratory which establishes maximum residue limits in excess of the Australian limit.
37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of bruising, fever, partial condemnation or emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY LEGISLATION

NSW Property, Stock and Business Agents Act 2002 Warnings

Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (i) to abstain from bidding; or
- (ii) to bid to a limited extent only; or
- (iii) to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

Tasmania Legislation. An auctioneer conducting a public auction must not appear to acknowledge the making of a bid if no bid was made. A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or do any other thing which may prevent free and open competition.

WA Auction Sales Act 1973 s31 NOTICE.

It is an offence to:

- (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- (ii) abstain or agree to abstain from bidding as a result of such a promise;
- (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
- (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
- (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.
